

CADCast Podcast Newsletter

Monday, August 14, 2006

boblupo@yahoo.com
Skype: boblupo

Released 08/14/2006

In this first issue of the CADCast Podcast Newsletter, I want to address the support and feedback that I have been getting - or lack thereof.

I began the podcast a few months ago as a way to provide information to the CAD community in a way that was not previously available. I am always looking out for ways to learn something new to keep expanding my abilities. I have known many CAD operators that think they know it all, and know that they are still in their "operator" status in a production house. My hope was to appeal to those users who are confident in their abilities, but also want to continue to grow professionally.

I am also glad to reach casual users such as engineers with the need to expand *their* capabilities.

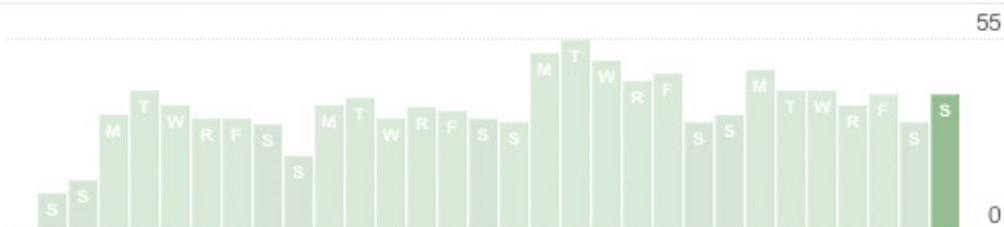

A screenshot of the Podcast Alley website. The header features the Podcast Alley logo with the tagline "Free the Airwaves" and navigation links for Home, Add a Podcast, and Podcast Software. Below the header, there is a section for "Pick a Podcast Genre:" with a dropdown menu, and a "Search for a Podcast:" section with a text input field and a "GO" button. To the right, a "Podcast Stats" box displays the following information: GENRE: Technology, COMMENTS: 1, AUGUST VOTES: 1, OVERALL VOTES: 1, MEMBER: 06/2006, and MONTHLY RANK: 1567. Below the stats, there are links for "Subscribe to Podcast", "Podcast Player", "Visit Website", "Leave Comments", and "Vote Now!". At the bottom of the search section, there are links for "Top Podcasts", "Add Your Podcast", and "Podcast Alley Badges".

Without feedback, I have no way of knowing if I am providing a valuable service that is worth continuing. The only feedback I have received is by the feed service (see below) which indicates a small listenership, however I have heard from only one on Podcast Alley. It appears that interest is not very high to the CAD community.

If you would like to continue to hear future episodes, please let me know.
